

Practical AI training. At your organization, worldwide.

Led by experts from Israel, shaped around your team's work. We help government bodies, institutions, businesses and corporate academies assess needs, design practical learning and support adoption of existing AI tools.

Introduction | 60-90 minutes

For leaders and teams exploring practical applications. Proposed outputs: a shared understanding of relevant tools, example use cases and questions for the next stage.

Practical workshop | 3-4 hours

Guided practice on selected work tasks. Proposed outputs: exercises and an initial workflow draft, using tools approved by your organization.

Tailored training and adoption series

Scope and duration shaped around your needs. May include role-specific learning, scoped pilots, working templates, coaching and follow-up.

Available on-site worldwide or live online. These are example formats and proposed outputs; delivery includes the items specified in your agreed proposal.

Preparation and delivery

Agree the audience, priorities, tools, licenses and device access. Use public or simulated exercise materials. Delivery language, location, timing, interpretation if required and practical travel arrangements are confirmed before booking.

Request a tailored training proposal

Share your country and city, audiences, goals, available tools and preferred timing. We discuss your needs, define the scope and prepare a proposal with the program, outputs and fee.
